

Session Title: GS5354-T - MyHeritage 101: How to get started and grow your tree in seconds

Speaker name: Aaron Godfrey

Speaker email: aaron@myheritage.com

Speaker social media links: [@acommsbloke](#) | [LinkedIn](#)

Overview:

Learn how to build a free online family tree and add names, photos, and facts. Then watch your tree expand with MyHeritage's breakthrough automatic matching. Find relatives you didn't know about and make amazing discoveries about your ancestors' lives — instantly!

To understand what MyHeritage is and what it can offer, we will first discuss the context of how MyHeritage came into existence, and the challenges it set out to solve.

We'll then look at MyHeritage's family tree and technologies, showing how to get started with the platform, and how to grow your tree quickly, and accurately.

We'll cover MyHeritage's flagship discovery technologies, and show how you can make discoveries just by entering some basic info. We'll look at some of the other tools available to break down brick walls in family history research.

We'll share some anecdotes along the way, show some relevant videos, and see live demos of the site in action.

And of course, we're looking forward to taking your questions.

After the class:

It doesn't end there! Visit www.myheritage.com, sign up for free, and start making discoveries instantly. Share your tree with your family, and preserve it online for generations to come.

Overview

More information on all MyHeritage products and services mentioned today can be found on our blog (<http://blog.myheritage.com>) or YouTube channel (<https://www.youtube.com/MyHeritageLtd>)
